

# FAST TRACK

Style & Options Guide

# Using this Guide

The 9Wood Fast>Track program is continually expanding. This guide lays out all currently available Fast>Track styles and configurations.

## Finishes

Fast>Track products can be provided with clear finish, one of 9Wood’s standard colors/opagues, or a custom color match (to a provided control chip). Custom colors add time in approvals, but the production timeline remains the same.

CLEAR FINISH

STANDARD COLORS

BLACK & WHITE OPAQUE

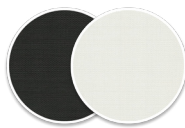

CUSTOM

## Components & Hardware

For assembled products (like Grilles) all additional components (backers, dowels and/or fabric scrim) are available in black or white. Progressively installed Linears such as Continuous Linears will call out the clips required for attachment, as well as applicable fabric options.

BACKERS - 1/2" PLYWOOD  
BLACK OR WHITE OPAQUE

FABRIC SCRIM  
BLACK OR WHITE

DOWELS - 1/2" FSC BIRCH  
BLACK OR WHITE OPAQUE

ATTACHMENT HARDWARE

## Walls & Accessibility

Several styles are available for both wall and ceiling applications. There are also options for ceiling access when repeated access to the plenum is required. Some styles are fully accessible throughout the entire ceiling, while others may require factory or field modifications. Hybrid Panels can be mixed and matched across a ceiling surface to create unique textures.

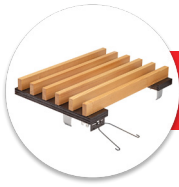

## Certified Wood

All wood materials are sourced as LEED v4/4.1 compliant. Solid Western Hemlock is fully PEFC certified, and all veneer/core, backer, and dowel materials are FSC certified. Style headers will display the species available, with material size, spacing, and length options found in the table.
