

Dropshipping with CommentSold

Test new products and reach more shoppers with CommentSold’s Dropship Program.

As a multi-channel e-commerce platform, CommentSold offers many of the same features as Shopify for running a successful online store without the extra costs, additional plugins, or complex design tools.

The Benefits

- 1

Grow revenue with new, name-brand inventory.

Participants gain unique access to products from Judy Blue, Wishlist, MonoB, Candy Club, YMI, Molino, EC Collection, and Trendy. We plan to expand our brand offerings in the near future!
- 2

Expand your reach with product offerings at competitive, low rates.

Retailers receive competitive pricing and margins not normally available sellers.
- 3

Test new inventory without upfront purchasing.

Expand your product offerings without upfront fees. See how shoppers respond to new items to help inform future purchasing decisions.
- 4

Bypass warehousing and fulfillment.

Enjoy the benefit of added sales without the hassle of backend operations. Products are shipped straight to your shopper’s doors from the CommentSold warehouse.

How it Works

You'll receive a specially curated sample box of products from the CommentSold warehouse. These items will automatically appear in your dashboard—you're then free to incorporate them into your live sales for the designated allocation period.

Within 24 hours of a customer’s purchase, that product will be shipped directly from our warehouse to your shoppers. Once the box’s allocation period ends, you can mail your samples back to us with the provided return label, and we will take care of the rest!

The Details

- ✓

No Hidden Fees

There are no additional fees to participate in our Dropship Program.
- ✓

Who Is Eligible?

Only shops currently using CS Payments are eligible to join. CommentSold cannot guarantee when a shop will formally be enrolled. Sign up below to join our waitlist!
