

Museum Experts

These are the spokespeople from the Denver Museum of Nature & Science for the “Mazes & Brain Games” **experience**. Educators provide professional knowledge from their respective fields of study to enhance the content in the **experiences** and traveling exhibitions hosted by the Museum.

Kelsi Cowan is a program coordinator at the Denver Museum of Nature & Science and serves as an educator for this exhibition. She joined the Museum in November 2021 to help manage and coordinate programming in several permanent exhibitions: Discovery Zone, Gems & Minerals and Prehistoric Journey. Cowan earned her bachelor’s degree in recreation, park and tourism sciences at Texas A&M University. Before coming to the Museum, she served as an educator and guest experience manager at the Museum of Discovery in Little Rock, Arkansas, for six years. Mazes and Brain Games is Kelsi’s first temporary exhibit to serve as educator.

Kelsi seeks out puzzles in her daily life – Sudoku, crossword puzzles, escape rooms – and is looking forward to conquering the many puzzles, riddles and illusions in “Mazes & Brain Games.”

Selene Figueroa is a bilingual programs coordinator at the Denver Museum of Nature and Science. In her two years at the Museum, she has done everything from overseeing “Space Odyssey” exhibition operations and SCFD Community Free Days to serving as a summer camp director. After graduating from the University of Denver with a bachelor's degree in law and society, Selene has worked in the nonprofit and museum industries to create pathways for engagement for communities whose voices have been historically and systemically silenced.

Selene is eagerly awaiting to try her hand at the experiences in “Mazes & Brain Games,” and is dusting off her Wordle streak to prepare!
