What's New in Destiny 19.6

Welcome to Destiny version 19.6. Destiny is a complete library and resource management system that can be accessed from anywhere, 24/7, helping to strengthen the bond between the library, classroom, and home.

This new version incorporates many of your suggestions, and we are confident the enhanced features and functions will meet your needs. We continue to improve Destiny for today's students, teachers, administrators, and librarians.

We know you will want to begin using these enhancements right away!

Notes:

- To update to the latest version of Destiny, you must be on Destiny v12.0 or later. If you have a version of Destiny earlier than v12.0, you must first update to Destiny v12.0 before you can update to v19.6.
- Some Destiny Discover features will not be completely visible until you upgrade to Destiny v19.6.

Following are descriptions of the new features in Destiny v19.6.

All Destiny Products

19.6 Security Updates

Our commitment to make Destiny the most secure and stable library and resource management system available continues. Enhancements to Destiny 19.6 include upgrades to the web server for increased security, as well as better performance. Contact Technical Support for more information.

Destiny Library Manager

19.6 MackinVIA Title Sync

An expanded integration makes it easier to maintain MackinVIA™ eBooks and audiobooks, alongside the rest of your Destiny Discover collection. Digital resources purchased from Mackin™ are now synchronized in Destiny Discover via the Follett Digital Update job.

You no longer need to:

- Manually add new titles.
- Update title records with new information provided by MackinVIA.
- Delete titles that are no longer part of your collection.

These enhancements also lay the groundwork for more points of integration in future releases, such as resource availability, checkouts, and more.

How to Participate:

Mackin has chosen to make this feature available as a closed beta, meaning only a limited number of districts can utilize the feature in early 2023 until it is available for wider release. Districts will be added gradually as the integration is optimized. If your district would like to activate this feature as part of the beta release, please email Mackin's Digital Services team at eservices@mackin.com to be placed on the participation list.

Note: If you previously integrated Destiny with MackinVIA, there is no additional Destiny setup required.

For more information on integrating Destiny with MackinVIA, see *Enable MackinVIA Integration* in Destiny Help.

For more information on the Follett Digital Update process, see *Update Follett Digital and MackinVIA Titles* in Destiny Help.

19.6 Shelf List Report

Site users with genrefied libraries can now add the Sublocation field to the Shelf List report to easily see where materials are on the shelf and more effectively manage their library.

The screenshot shows a web form titled "Generate a shelf list showing...". It includes several sections for filtering and generating the report:

- Include Call Numbers:** A radio button is selected for "All ranges and prefixes in the collection". Below it, there are "From" and "To" input fields.
- Count Circulations:** Two input fields with "31" in them, separated by "to". Below them is a checkbox labeled "Include circulations from in-library use".
- Date Acquired:** Two input fields with "31" in them, separated by "to".
- Sublocation:** A dropdown menu is set to "All Sublocations", with an "Update" button next to it.
- Show:** A radio button is selected for "Price". Below it is a radio button for "Publication Year".
- Output as:** A dropdown menu is set to "PDF".
- Run Report:** A blue button at the bottom right.

There is a "How do I..." link with a question mark icon in the top right corner of the form.

For more information about how to create the report, see *Generate a Shelf List* in Destiny Help.

Destiny Resource Manager

19.6 Advance Booking

Destiny Resource Manager's new advance booking feature lets districts save money by sharing occasionally used resources.

After the district purchases a site license, the Destiny Administrator adds a new site to Destiny. Resources are added to the advance booking site. Staff with advance booking site access can book resources immediately or for the future for users throughout the district.

Advance booking site staff can manage, edit, and process a reserve. It is easy for staff to identify items they need to pick for upcoming reserves, and print packing lists and shipping labels. They can also check in booked items, import and transfer resources, set delivery and pickup dates, and run reports.

For more information about advance booking, see *Book Items* in Destiny Help.

19.6 Item Transaction Report

Site users can now use the new Item Transaction report to extract circulation event data based on a specified date range. With the XML file, users can view and manipulate data, including checkouts, checkins, fines created, fines deleted, lost and stolen items, and circulation blocked messages.

For more information about how to create the report, see *Item Transaction Data Report* in Destiny Help.

19.6 Google Workspace-to-Destiny Disable, Re-enable, and Deprovision Rules

Users of the Destiny Resource Manager Mobile Device Management (MDM) Integration feature can now determine what happens when Google Workspace has a device disable, re-enable, or deprovision event. If any of these checkboxes are selected, the Checked Out or Not Checked Out item's status in Destiny is changed to the option selected in the drop-down.

For more information, see *Customize Destiny Rules* in MDM Integration Help.

19.6 Destiny-to-Google Workspace Transfer Rule

Users of the Destiny Resource Manager Mobile Device Management (MDM) Integration feature for Google Workspace can now determine what happens when an item's site is changed in Destiny. If this checkbox is selected, the item is moved to the site it is mapped to in Google Workspace. If the site is not mapped, the user can choose an Organizational Unit (OU) to move it to.

Destiny to Google Workspace
When the following happens in Destiny Resource Manager, do this update in Google Workspace.

☒ If Destiny changes the **Site** → Move the item in Google Workspace to the **Mapped Site**. If the site is *not mapped*, Move the item to **Organizational Unit** **Don't Move** 

For more information, see *Customize Destiny Rules* in MDM Integration Help.

19.6 Destiny-to-Jamf PRO Lost and Stolen Rules

Users of the Destiny Resource Manager Mobile Device Management (MDM) Integration feature for Jamf PRO can now determine what happens when items are marked Lost or Stolen in Destiny. When users select a checkbox, the item's status in Jamf PRO is changed to the option selected in the drop-down.

Follett Destiny Resource Manager

Mobile Device Management / Destiny & MDM Rules

 **PRO Update Rules:**

Destiny to Jamf Pro
When the following happens in Destiny Resource Manager, do this update in Jamf Pro.

☒ If Destiny changes the **Status** to **Lost** → Set the item's **Status** in Jamf Pro to

Lost Mode Options ^
Lost Devices will display:

Message:	Message to display to user
Phone Number:	5555555
Footnote (Optional):	Footnote to display

Always enforce lost mode: ☐

Locked
Wiped
Unmanaged

For more information, see *Customize Destiny Rules* in MDM Integration Help.

Destiny Discover

19.6 Destiny Discover Enhancements

Destiny Discover is more customizable than ever! This fall, several new setup options were added to make it easy to customize the search experience with relevant and engaging features to meet your students' needs. The latest updates let you:

- Choose from new theme options.
- Configure features by user role, such as reviews, citations, and search options.

With the latest enhancements to [Destiny Discover Engage](#), users can now track usage of print and digital books from any provider!

Note: Destiny Discover Engage is an add-on subscription to Destiny Library Manager.

To learn more and stay on top of the latest updates, visit the [Destiny Discover What's New page](#) in the [Destiny Discover Help Center](#).

The logo is a stylized 'F' composed of two overlapping curved segments. The left segment is light blue and the right segment is light orange. They meet at a central white space, creating a continuous, flowing shape.
