

EXBERRY® Organics

Bring your applications to life with GNT's newly expanded range!

While health-conscious consumers may be naturally drawn toward organic and plant-based food and drink, there can be a perception that healthier products are less enjoyable.

While these attitudes are changing rapidly, it is essential to ensure products look appetizing. EXBERRY® Organics are an ideal solution, helping manufacturers meet the growing global demand for plant-based products that are both organic and visually appealing.

Our EXBERRY® Organics Coloring Foods allow you to achieve exceptional shades in a wide range of products. Now with an expanded portfolio, the new EXBERRY® Organic Powders deliver optimal performance in dry applications like instant beverages, sauces, seasonings and dessert mixes.
