

Life of Well Disposal Solutions

An Interventionless Packaged Solution

Let Halliburton deliver your life of the well disposal solution package. Whether it is an acid gas injection, salt water disposal, CO2 injection, or anything in-between - set it and forget it. With Halliburton, one set is all you need to do it right the first time.

Surface Units

- » The Clariti™ platform, part of the eCompletions™ ecosystem, provides visualization and alerts to downhole changes in pressure and zonal flow allocation.

Tubing-Retrieveable Subsurface Safety Valve

- » NE™ tubing-retrieveable subsurface safety valves have an enhanced flapper valve designed for superior reliability and long life span, while meeting all state and federal regulation requirements.
- » Set it and forget it.

Expandable Liner Hanger

- » VersaFlex® liner hangers provide expandable solid tubular technology for a bi-directional, gas tight, annular seal.
- » MatchSet™ liner hanger systems help solve well challenges where modular design capability and minimizing risks are key priorities.
- » Set it and forget it.

Pressure Temperature Gauge

- » DataSphere® SmartLog™, Opsis®, Array, and ERD™ temperature and pressure gauges allow operators to obtain long-term wellbore data to make informed decisions that can increase disposal capacity for the life of the well.
- » Set it and forget it.

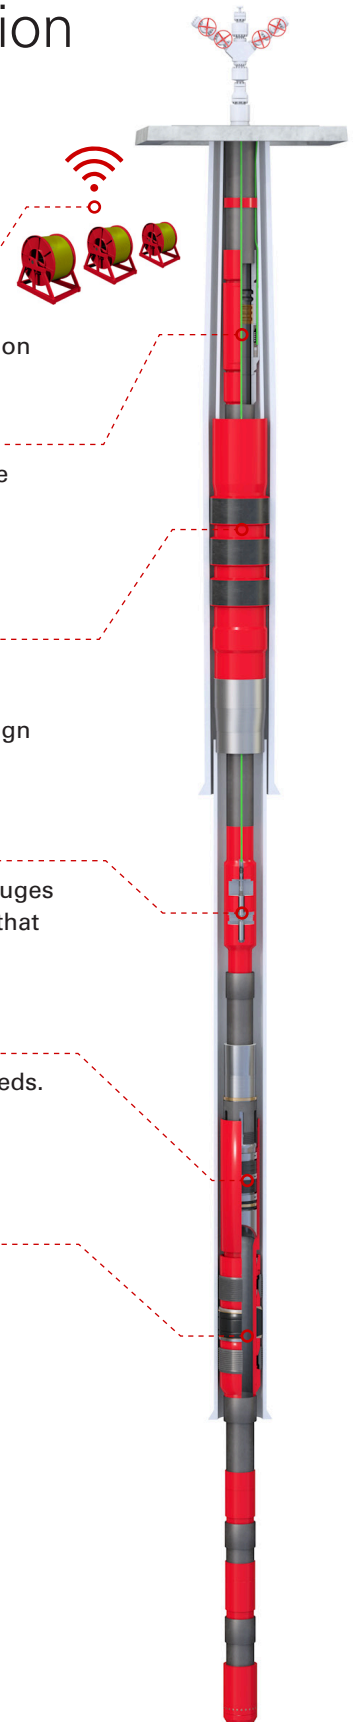

Permanent Packer Solution for the Life of the Well

- » Perma-Series® packers are created with customized metallurgy to meet your needs.
- » We utilize our proprietary CyberString® and tubing movement software is used to ensure we have an optimized, leak proof installation.
- » Set it and forget it.

Retrieveable Saltwater Disposal Packer

Versa-Set® wireline-set or tubing-set packers are re-settable, retrievable, and ideal for medium-to high-pressure environments.

- » Economical packer, ideal for shallow saltwater disposal wells.
- » Wireline-set or tubing-set, re-settable, retrievable packer.

Sales of Halliburton products and services will be in accord solely with the terms and conditions contained in the contract between Halliburton and the customer that is applicable to the sale.
