**tado°'s Smart Thermostat Black Edition is available from now on**

**Munich, 14. November 2022** - Today tado° announces that its Smart Thermostat Black Edition is now available in all European countries. With the Smart Thermostat Black Edition, tado° offers its users a new way to complement their interior designs and accentuate personal taste, after collaborating with the tado° community.

While customers face increasing energy prices, tado° Smart Thermostats save on average 22% on heating costs per year. Thanks to intelligent app features like Geofencing, Open-Window-Detection, Smart Schedules and many more, customers can reduce their average heating bill of £1,050.55 for a typical home house to £819.43 by using a tado° smart thermostat. Considering the current energy costs, tado° Smart Thermostats pay for themselves within less than 6 months of use.

**A collaboration with the tado° community**

Together with the community tado° worked on a solution for more people to take advantage of the smart features that tado° thermostats provide, whilst complementing their personality and

interior design choices. After rounds of feedback, a dark display was one of the most requested features.

Christian Deilmann, Co-Founder and CPO of tado° said “We heard many tado° users looking for more ways to bring tado° into different rooms of their home. A darker thermostat was much requested by the community, and we managed to find the right materials and design choices to bring this to the community in an elegant and sophisticated manner”.

### **Dark Mode**

For a unified experience, tado° also brought dark mode to the tado° app. tado° users have requested dark mode for aesthetic reasons, phone battery savings, or even for checking the temperature at night in dim-lit environments. With tweaked contrast and colours in dark mode, the tado° app complements the Smart Thermostat Black Edition or any existing tado° products. Dark mode can be activated in the device settings on iOS and Android.

### **Availability**

The tado° Smart Thermostat Black Edition, will be available in Starter Kits in both wired and wireless variants, as well as standalone. Smart Thermostat Black Edition launches in all European countries at RRP €249.99 for the wireless starter kit, or €219.99 for the wired starter kit. In the UK, the Wireless Starter Kit is available on tado.com, or at Screwfix stores for £99. The Wired Starter Kit is available at tado.com in the UK for £179.99.
