

Accelerate Cloud Migration of Media Files with Signiant Jet and Wasabi

Overview

Signiant Jet is an intelligent file transfer solution designed for the rapid movement of large files and data sets from endpoint to endpoint. Through the use of Jet users can easily automate the transfer of data from one on-premises system to another across long distances or to and from the cloud.

Global File Transfer

Jet is most beneficial for recurring, time-critical transfers that involve large files moving over long distances or congested networks. Companies with multiple locations who need to automate the movement or syncing of data between those locations can do so quickly and easily with Jet. Offering a simple way to automate file movement along complex global supply chains, Jet empowers users to improve content exchange both internally and with partners.

Automated Cloud Work flows

Jet accelerates movement of data housed in on-premise systems to the cloud. From the Jet interface, users can select Wasabi as a storage endpoint. By creating a route to a Wasabi data center, users can schedule transfer jobs for regular completion or create Hot Folders to automatically send files to new locations as soon as they are added or updated within the folder.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Signiant and

KEY FEATURES

- Transfer scheduling
- Easy-to-use web-based administration
- "Hot Folders" where any files placed into a folder can trigger an automated transfer to one or more locations.

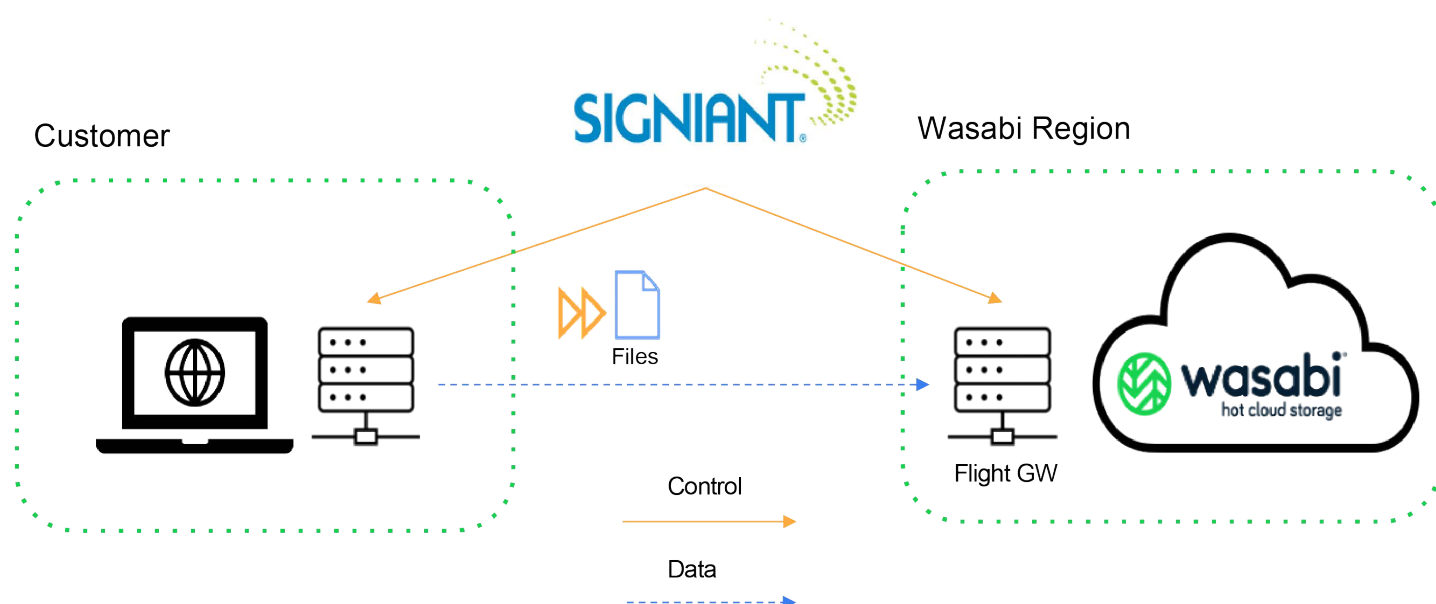

BENEFITS

- Speed up data movement & cloud adoption
- Facilitate inter-company content exchanges
- Reduce cloud storage costs and complexity

Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

Signiant and Wasabi Together

As more and more media companies move workflows to the cloud, Jet makes it easy to automate the movement of content to and from the cloud with unprecedented speed, reliability and security. The large size of video files can make cloud migration an arduous process; a media library may take days if not weeks to fully move to the cloud and upload errors only add time and difficulty to that process. Jet ensures that large media files arrive in Wasabi quickly and without error. Jet's acceleration and automation features ease the migration of media to the cloud. From Jet's easy-to-use interface, Wasabi's cloud storage buckets can be easily selected as storage endpoints for data migration, drastically reducing the time it takes to move large media files to the cloud.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
