

**STYLE:** 4400 TORSION SPRING TILE

# Overview

The 4400 Torsion Spring Tile wood ceiling offers a floating tiled appearance with downward access. The 4400 style snaps up into butterfly-notched T-Bar brackets. The reveal between panels are 3/8" wide.

Attachment for the Torsion Spring Tile is via 9Wood's Torsion Spring Bracket and Butterfly Clip.

## Product Data

## **Application**

The Torsion Spring Tile provides a floating tiled look with concealed suspension using real wood veneers on fire rated cores. This is an accessible system, with pull down, spring release accessibility. It can be engineered for seismic compliance. Tiles may be perforated (see series 5000 Perforated Wood Tiles).

### Performance

#### **Acclimatization**

Wood Tile products must be cared for in a controlled interior environment (RH 25%-50% max; temp. 50°-85°) and installed only after reaching equilibrium moisture content. Should the building fall outside these limits consult 9Wood for our 3 Tests/3 Tracks Acclimatization Advisory.

#### **Acoustics**

The 4400 style is considered acoustically reflective unless perforated.

#### **Fire Rating**

Individual members and components can be coated with Class I (A) Fire Retardant chemicals (veneered particleboard use FR formulas). Particular species or styles have not been tested.

#### **LEED**

9Wood products may qualify toward MR-3, MR-4.1/4.2, MR-5.1/5.2, MR-6, MR-7, IEQ-4.2, IEQ-4.4. As all products are custom-fabricated, LEED credit opportunities are project by project. Please contact 9Wood for specifics.

#### **MEP**

The 4400 tile permits MEP penetrations in the ceiling's surface. Supplemental suspension may be required at penetrations. Fixtures and diffusers must be independently supported.

#### Seismic

Torsion Spring Tiles can be engineered to meet seismic requirements. Consult local code for any additional requirements or a licensed local engineer.

#### **Species & Finishes**

Domestic and imported species are offered; clear, matte sheen finish is typical; custom color matches and opaque finishes available.

#### Suspension

Wood Tiles are suspended using 15/16" heavy duty T-bar main runners. Main runners are installed 2' on center, depending on tile weight.

#### **System Weight**

The 4400 Torsion Spring tile typically weighs 3 pounds per square foot.
