

Stay ahead of the curve with Drivewyze

It's impossible to know what's around the corner...or is it?

Empower your drivers to make safer decisions with in-cab notifications about potential hazards, giving them time to safely respond to the road conditions ahead.

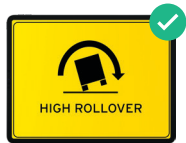

Customize Your Alerts

Easily build your own in-cab alerts with audio and visual cues to keep drivers informed as they approach hazards or protocols.

Actionable Insights

Straightforward reporting allows you to quickly highlight high-risk locations and drivers.

Library of Alerts

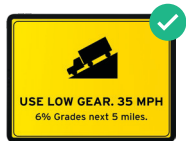

Rollover Alerts

Alerts drivers 1000 feet before curves and intersections with significant rollover history. Proven to reduce speed before locations known for rollovers.

Real-Time Congestion Alerts

Alerts drivers before congested traffic and where sudden slowdowns occur. Gives drivers more time to slow down safely.

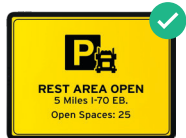

Mountain Corridor Alerts

Drivers are shown site-specific advisories, including speed and lane usage, in mountain corridors. Keeps drivers safe in critical moments.

Low Bridge Alerts

Alerts drivers 1-2 blocks before low bridges, with location-specific clearance. Gives drivers the notice they need to avoid costly impacts.

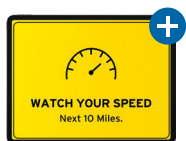

Rest Area Alerts

Shows real-time parking space availability at rest areas and other parking centers. Makes it easier to find a safe place to park.

Real-Time Cargo Theft Alerts

Alerts drivers when they are entering high risk areas, as identified by CargoNet®. Up-to-date and location-based cargo theft alerts help drivers stay safe in unfamiliar areas.

Speed Alerts

Alert drivers to areas where speeding violations happen most frequently. Proven to reduce over-speeding events in these critical locations.

Custom Alerts

Remind drivers of protocols at a depot, how to maneuver in a yard with limited room, or how to implement safe driving practices. Makes it easy to communicate with drivers using location-based custom alerts.

Severe Weather Alerts

Real-time warnings about the conditions ahead so drivers can prepare before they're in unsafe conditions or stuck in traffic. Helps avoid the 23% of delays on roadways caused by adverse weather conditions.
