

# QUATTRO<sup>®</sup> QUICK-LINK<sup>™</sup>

## USB, POWER, & DATA SYSTEM

Keeping pace with technology — and the electrical requirements of over 45 countries — our Quattro Quick-Link power and data systems are specially designed for easy network installation, maintenance, and user access in both wired and wireless environments. Completely modular, Quick-Link system is designed ergonomically to allow users easy and comfortable access while seated. As with the entire Hussey Quattro and Quattro Traditional collections, Quick-Link was designed to meet a long list of rigorous requirements, including: ease of maintenance; withstanding punishing daily use; Hussey's top quality standards; flawless function; and of course, as with the rest of the Quattro collections, highly refined aesthetics. Quick-Link's finished details perfectly complement Quattro's distinct style, making it an asset to any facility or venue. Quattro Quick-Link - a power and data revolution. *Entirely by design.*

different. by design.

Hussey Quattro Quick-Link USB, power & data system provides a modular and easy to maintain solution for both wired and wireless environments.

## QUATTRO QUICK-LINK / TECHNICAL INFO & FEATURES

- Each chair can have one power enclosure, with duplex outlets and two USB ports. Four different USB configurations are available
- All wires are isolated from each other, in a continuous raceway located under the seats - supported by a hanger, on each chair, that houses that chair's power outlet and data jack
- The Quick-Link system can be retrofitted
- Quick-Link is available in all Quattro chair widths
- Quick-Link can be specified with small, medium, or large tablets
- Quick-Link can be specified for riser or floor mount stanchions
- Quick-Link 2 can be installed on Floor Slopes #0 - #3
- Quick-Link 2 can be installed on Aluminum, Steel, and Traditional Stanchions
- Quick-Link 2 with USB (Type A and C), supports power connections for US markets
- Quick-Link 1 has been designed to accommodate power point connections for more than 45 countries including: the United Kingdom, continental Europe, former Soviet Republic and Eastern Bloc countries, China, Australia, South America, and African and Middle Eastern nations
- Designed for power in-feeds of single-phase 120V, 20A (minimum) grounded supplies
- Quick-Link's in-feed can be located at either end of a particular row. Connection is made at a customer-supplied junction box
- Each in-feed location can supply up to 10 chairs
- Data cable in-feed situated at the same location as power (under the chair at the end of the row)
- Data cables are to be CAT5 or CAT6 and supplied by the customer. Hussey will supply one female/female RJ-45 connector per chair (if the data option is requested)
